Report Time is the time delay in hours and minutes between when SecurityPlus detected the outbreak and the creation of the AV-Test.org report for each threat.

Zero Hour Detection. The SecurityPlus column shows the date and time when SecurityPlus detected the outbreak.

Blocked some of the attack. Time listed is the hours and minutes between when SecurityPlus detected the outbreak and detection time of other products as reported by AV-Test.org. SecurityPlus is not included in AV-Test.org reports.

No detection during the reporting period.

Trusted Messaging Solutions

*Outbreaks identified represent a small sample of the total threats generated during the month.
